81
   \subsection{项目符号、编号、说明}
82
   \begin{enumerate}
83
           \item 请根据个人口味混合各种环境:
84
           \begin{itemize}
85
                  \item 可能看起来很怪。
86
                  \item[-] 用横线。
87
           \end{itemize}
           \item 所以要牢记:放在列表里面的东西,
89
           \begin{description}
```

```
\item[蠢的]不会变聪明;
                \item[聪明的]会变漂亮。
92
           \end{description}
93
    \end{enumerate}
94
95
    \subsection{对齐}
96
    \begin{enumerate}
97
           \item 左对齐
98
           \begin{flushleft}
99
                   这些文字都是\\ 左对齐的。
101
                   \LaTeX{}不保证每行长度相同。
102
           \end{flushleft}
103
           \item 右对齐
            \begin{flushright}
105
                   这些文字是\\ 右对齐的。
106
           \end{flushright}
107
           \item{居中}

110
           \end{center}
111
    \end{enumerate}
112
    \subsection{引用}
113
    \begin{enumerate}
114
           \item 引用\\
115
            出于印刷要求,每行的长度要求为:
116
           \begin{quote}
117
                   平均来说,每行不应超过 66 个字符。
118
           \end{quote}
           这就是\LaTeX{}的页面有如此大的缺省页边距,而且报纸使用多列印刷的原因。
120
           \item 诗歌版式\\
121
           I know only one English poem by heart. It is about Humpty Dumty.
122
